Security doors

From ancient Roman times keys and locks played a big part in peoples lives. Keys symbolized some sort of power in the old days and were usually carried by people of wealth or people with control over others. Keys often meant the difference between freedom and captivity or life and condemnation. No matter what age or time, keys were always meant to unlock something or keep it locked, safe and out of sight from others. Many things have changed from the times of early Egyptian empire locking mechanisms, where the keys and locks were made out of wood to nowadays. Not only did the technology made a huge leap forward, but also our understanding of the keys and use of them changed. Nowadays keys are not a sign of power anymore, but more of an attribute to our daily lives. We have keys for everything: cars, luggage, safes, homes, offices, jewellery boxes, and many more.

In the 21st century keys, locks, doors and door entry systems not only play a major part in keeping a security of the building, but also enables desired functionality within the building. Nowadays technologies enable us to give access to our premises from other parts of the world via phone communication or allow us to program access to the building at only certain periods of time. With current advancements we can shield ourselves from bullets if we wish to do so and lock picking is a thing of a past long ago.

Stronghold security doors learn from the past and have insight into the future and therefore can offer you our customer the solution to suit the needs whatever they may be. We always research invest in new technologies and train out staff so we can give you the solutions to suit your needs for many years to come. We are certain that in this catalogue you will find something that will not only match, but exceed your expectations.

Stronghold

Security doors

Doors for you and your family

A door is like a heart and soul to a building, it provides a building its character, functionality and security. Every building has its own character and every family have their own requirements. Our bespoke door design capabilities, vast selection of materials and cutting-edge locking mechanisms combined will make sure you get what you want. Our highly sophisticated manufacturing techniques allow us to achieve any design, where it is a contemporary look or a traditional, we certainly have something to satisfy even the pickiest eye. If you are undecided of what it is that you really want, then our experienced advisers will give you a free of charge visit at your home comfort to discuss everything with you in detail until you get the solution that really want.

Security doors

1. Security hinge bolts keep the door in its frame when it's closed even if the hinges are cut off;
2. Fixing points protect from an attempt to cut the screws going through them;
3. Multi point locking system bolts go up into the frame and down into stainless steel threshold ensuring maximum security;
4. Security lock has 5 bolts going into the frame; the cylinder is protected with a cylinder defender system; the lock is encased into the steel box and is also covered by manganese plates to protect from drilling;

5. Galvanized steel construction gives the door its rigidity and ensures it can't be bent, rammed, kicked or smashed open with heavy duty tools such as axe, crowbar, hammer, etc;
6. Bended profile galvanized steel frame ensures maximum security and stability
7. Door steel construction is covered by 2 panels, this can be any design or material including security glass, natural wood, engineered wood, PVC laminate wood veneer, hand painted or factory sprayed in polyurethane paint.

STANDARD Door series

Our standard range doors were designed for internal conditions. These are lightweight security doors designed to withstand a burglary attempt where a silent attach is used.

- Lock picking
- Lock bumping
- Cylinder snapping
- Cylinder drilling

The standard range doors not only provide good security but also protect from fire, has good sound and heat insulation and are very durable. Our words are backed by many certificates that we get due to our constant testing and innovation.

Choose from the variety of our laminate choices to get a beautiful and durable solution for your home or office. Other type of materials and variations in design are available on request.

- 80mm profile frame
- 1.5mm thickness galvanized steel
- 41 dB sound insulation
- 200,000 cycles hinge durability test
- Class 3 or class 7 security locks
- Fire rating (FD30)

Door that cherish the heritage

These are so many beautiful things that our history left us, but time passed by and unfortunately there are no such things that could last the eternity. Doors are no exclusion, they start to rot, colours fade away and they lose their rigidity and strength. We cherish the heritage and therefore develop

the techniques where we can replicate any existing doors. We will achieve the same looks but will give the door a new face, modern locking mechanism and secure steel core, which will help to keep that beauty that our history left us for many years to come.

PREMIUM Door series

Our premium door range was designed for the external conditions. These doors are immune to harsh weather conditions, has premium sound and heat insulation qualities and will keep the draught out. This door range was designed to withstand a burglary attack where the methods used to gain a forced entry have little or no regards for noise. The tools used in such an attach include:

- Sledge hammers
- Axes
- Crowbars
- Light duty power tools
- Drilling tools
- Cutting tools

Choose from our vast range of materials, colours and designs to create your perfect door. If you live in a conservation area we can replicate your existing door giving it a new face and making it modern and secure, but keeping the same beautiful historical look. If you have seen something really nice somewhere and would like to get a similar door for your own home, then all we need is a drawing or a photo and we will do our best to reproduce the desired design.

- 100mm profile frame
- 1,5mm thickness galvanized steel
- 43 dB sound insulation
- 200,00 cycles hinge durability test
- Class 5-7 class locks
- Fire rating (45-60)

All products come with manufacturer warranty, doors 10 years and locks 3 years. Certificates included.

With us you become your door designer

It is our belief that to get a fully satisfactory solution one has to get involved into the process of making it. We encourage you to become part of the team when designing your door. Our carefully thought out system lets you to become

just that. That doesn't mean you will be doing our job, but our job is to find out what our customer really wants and will work with you until we find that out so you get your dream door.

ROYAL Door series

The royal range is the culmination of our constant research and advancement in technology. These doors boast unique security features capable of satisfying the most demanding security needs. They were designed to protect the premises where there is a large possibility of deliberate and planned attack with no regard to noise. Royal doors can withstand a prolonged attack with the following tools:

- Heavy duty power tools
- Light duty hydraulic tools
- Cutting and drilling tools
- Ramming
- Bullet proofing (upgrade needed)

If you have a unique, one of the kind projects with special requirements then our optimum doors are just right for you.

Our unique design options, with prime security features will satisfy even the pickiest eye.

Our materials, colours and design will help you choose the best option suitable for your home. If however you can't find what you are looking for then our designers and security advisers

- 115mm -1300mm profile frame
- 2mm thickness galvanized or stainless steel
- 45dB sound insulation
- 200,000 cycles hinge durability test
- Class 7 security locks
- Fire rating (60)

All products come with manufacturer warranty, doors 10 years and locks 3 years. Certificates included.

FIRST OF IT'S KIND pivot door

Flush pivot door with double seal is our brand new design, tested and available for bespoke orders. This type of door is high-end in engineering solutions for contemporary style entrance needs.

1. Double seal all round
2. L shaped frame for security
3. 100mm thick
4. Flush finish inside/outside
5. Available in outstanding dimensions
6. Integrated drainage

Security for your home and business

Honest people strive hard so they can get a good life for them and their families. Unfortunately, times are changing for the worse and there are people who will try to take what's not theirs regardless of what it takes, whether these are valuable family possessions or business documents they will stop at nothing. Normal secu-

rity measures don't work anymore and this is where we come in. Our doors use technologically advanced steel structure and locking mechanism from the world's top manufacturers to provide your premises the impenetrable yet stylish security solutions.

ISEO x1R Smart

The basic mechanical lock has been enchanted with electronic components of the latest generation, meaning access to our homes can be intelligent, but above all practical and safe, offering a radical change in performance. security doors can now recognise us, they open on our arrival and close as soon as we enter our home. they can communicate with the alarm system if required. all automatically. all in absolute safety. Why not open the door to technology and innovation?

TRANSPONDER READER (TAG)

locks equipped with the electronic system can be opened by simply placing the electronic xKey containing the transponder close to the external face-plate

KEYPAD

The insertion of numeric code (up to a maximum of 8 digits) is processed by the internal electronic board processing unit, and if acknowledged as valid causes the lock to open.

RADIO CONTROL

The radio control is the "Rolling" Code type, in other words, the radio frequency transmitted code changes every time that control button is pressed.

INTERNAL PROGRAMMING LOGIC

used to program the system's performance and mode of operation, but also includes a key for quick opening of the lock from inside the home, a LED light signal and buzzer for acoustic warnings, including one for the amount of charge left in the batteries.

Never again worry that your children, parents or neighbors might lose a key. With an ekey fingerprint scanner, you no longer need to give your key to someone, because you simply authorize those people who need access to your home. Lost keys are a thing of the past.

OPEN THE DOOR SAFELY AND CONVENIENTLY WITH YOUR FINGER.

YOUR FINGER AS A KEY
Make sure you can unlock the door any time. Keys, cards or codes can be lost, misplaced or forgotten – your finger is always on hand!

HIGHEST SECURITY
Only authorized persons can open the door with the ekey dLine fingerprint scanner. An ekey dLine fingerprint scanner is 1,000 times more secure than the 4-digit number code of an ATM card.

ENJOY SMART HOME CONVENIENCE AT THE FRONT DOOR

REMOTE OPENING¹

Never again have to wait to let the handyman into the house. In an emergency, you can unlock the door from anywhere – be it from the office, on the go or on vacation!

PUSH NOTIFICATIONS¹
No more uncertainty! You receive a notification on your smartphone as soon as your loved ones come home.

VIRTUAL ASSISTANT¹
Connect your ekey dLine fingerprint scanner to Amazon Alexa and simply open the door with a voice command. Or receive a personal greeting when you get home!

ADAPT THE SYSTEM TO INDIVIDUAL NEEDS

FLEXIBLY EXPANDABLE SYSTEM
With the ekey dLine, you don't have to determine the scope of your access control system in advance. Functions, users and devices can be added at a later date.

PERSONALIZED TIME SLOTS²
You can restrict access authorizations to certain days and times. This way, you determine who is allowed to enter your home and when.

DOOR GALLERY

Security glass

Our glass has been tested accordingly by EN356 Standard and is a highly secure glass created to provide maximum protection against deliberate attack. Designed to protect both people and property from harm. ESG secure will also resist intrusion by professional burglars and thieves.

Laminated security glasses provide several levels of goods protection:

- Protection from vandalism and break-ins: protection from stone-throwing, petty crime, premeditated assaults by assailants working against a clock
- Protection from theft: protection from organised theft as well as from repeated, premeditated attacks by assailants using heavy tools.
- Laminated Security glasses prevent or slow down Break-ins and deter criminals.

Bulletproof

Ballistic bullet-resistant glass provides high-level security glazing with defined resistance against the firing of specified weapons and ammunition. This bullet-resistant glazing is specially designed to absorb both the impact and the enormous energy projectile and to contain it within the glass panel. this allows protection to those on the other side of the glass, preventing life-threatening injuries.

Our ballistic bullet-resistant glass has a vast array of potential applications including military installations, government buildings and other secure institutions: personnel protection screens in banks, building societies, airports, post offices, betting shops, petrol filling stations and cash desks.

Fire-Resistant

Fire environment is hostile and its effects can be catastrophic for both life and property. The occurrence of fire and its development is also essentially unpredictable and uncertain. Two basic criteria are governing a glasses fire-resistance rating:

- the flame retardant criterion (integrity, low radiation);
- And the fire-retardant criterion (integrity, total isolation)

Choosing the correct fire glass is critical and will only work if all components within the product meet the needed fire requirement
